BOOK SYNOPSIS

Newly revised by the American Medical Association (AMA), the Graduate Medical Education Directory (or the "Green Book") contains extensive information on more than 8,900 Accreditation Council for Graduate Medical Education-accredited residency, fellowship, and combined programs in the United States, as well as residency application and career-planning resources to help in making one of the most important professional decisions that a medical student faces. Through its annual survey of all accredited and board-approved graduate medical education (GME) programs, the AMA has identified numerous revisions and updated specialty/subspecialty information, including Match data and more. Other changes to the 2010-2011 edition include 174 new programs, 102 withdrawn programs, and a revised listing of teaching institutions. This is the only reference that delivers complete and current information for planning a medical career.
